Builds and supports Java/Spring Boot services, SAP Commerce Cloud extensions, AWS workloads, microservices, and REST APIs; owns integrations, deployments, production troubleshooting, and root-cause analysis. Recipient of the CJSS Innovation Best Employee Award, with hands-on RAG, vector-search, and AI-integrated development experience.

PROFESSIONAL EXPERIENCE

CJSS Technologies Pvt. Ltd. Software Engineer

Hyderabad, India
Aug 2026 - Present

Client: Changi Airport Group | iShopChangi - SAP Commerce Cloud

- Deliver backend enhancements across catalog, product, pricing, promotions, orders, customers, and checkout using Java, Spring, and SAP Commerce Cloud.
- Translate business requirements into OCC APIs, custom extension layers, items.xml models, populators/converters, and maintainable commerce processes.
- Own FlexibleSearch, ImpEx, Solr, CronJobs, catalog synchronization, and Backoffice operations; troubleshoot cross-layer incidents and validate releases.

Software Engineer

Jan 2024 - Jul 2026

Client: Changi Airport Group | TREX - Cloud-Native Marketplace Platform

- Delivered Java/Spring Boot microservices and REST/GraphQL APIs for product, pricing, order, merchant onboarding, contract, user, and promotion workflows.
- Built AWS Lambda/AppSync serverless workflows and Dockerized ECS services backed by DynamoDB and relational databases; integrated SAP and Okta.
- Used Dynatrace/Datadog, distributed tracing, and log analysis to isolate production issues; optimized backend/database paths and completed post-release validation.
- Developed JUnit/Mockito tests and applied GitHub Copilot/ChatGPT to test generation, refactoring, documentation, and PR quality checks; mentored junior engineers through reviews and debugging.

SELECTED ENGINEERING PROJECTS

Healthcare Information System (HIS)

2026 - Present

Java | Spring Boot | PostgreSQL | JPA/Hibernate | JWT/RBAC

- Built a modular backend for registration, appointments, billing, pharmacy, laboratory, administration, and audit logging; secured access with JWT and RBAC.
- Designed relational models, validations, exception handling, and audit trails; handled deployment troubleshooting, defect resolution, and enhancements.

AI Chatbot / Multi-Agent RAG Platform

Independent Project

Spring Boot | Python FastAPI | Gemini | Qdrant | Vector Search

- Implemented an end-to-end RAG pipeline covering ingestion, embeddings, semantic retrieval, and response generation across Spring Boot and FastAPI services.
- Applied Qdrant vector search, metadata/payload filtering, RBAC, and context-aware generation to deliver secure, grounded responses across specialized agents.
